

CADTEC Dentures

Convenience. Quality. Innovation.

Denver Dental Arts is proud to offer CADTEC Dentures to our clients. Our Economy and Premium Dentures are fabricated using two innovative processes, 3D printing and digital milling. These removable options reduce the number of appointments required, which saves you chair side time and money.

- ✓ *Digital Record for Easy Replacement*
- ✓ *Digital Workflow for Fast Turn Time*
- ✓ *Requires Only 4 Appointments*
- ✓ *Reliable & Repairable*

Economy Dentures

Our 3D printed dentures offer lifelike function and consistently reliable design at an accessible price point.

Premium Dentures

Digitally milled using the latest CAD/CAM equipment, our premium dentures offer superior esthetics for high patient satisfaction.

See reverse for instructions on sending traditional and digital impressions, so you can prescribe CADTEC Dentures from Denver Dental Arts.

Prescribing CADTEC Dentures

CADTEC Dentures can be prescribed with traditional or digital impressions. Sending either is easy with our easy-to-follow guidelines below.

Replacing a Current Denture

- 1 Impression** - Provide DDA with a traditional or digital impression of current denture with wash inside.
Be Sure to Include:
 - **Traditional:** Denture with wash, opposing model, and bite.
 - **Digital:** Scan of existing denture with wash relines, bite scan, opposing scan, and facial photos of high and low lip line.
- 2 Approval** - DDA will provide our digital design for approval.
- 3 Final** - DDA will mill or print the final denture.

Embrace Innovation

with Digital Dentures!

Prescribing a New Denture

Step One: *Impression*

Provide DDA with a traditional or digital impression.

Step Two: *Model*

DDA will create model and bite rims based off impression from 2nd appointment.

Step Three: *Scan*

DDA will scan traditional bite rims and the model/impression.

Step Four: *Design*

DDA will create a digital set-up and design.

Step Five: *2nd Appointment Try-In**

You will receive a printed denture try-in.

Step Six: *3rd Appointment Final*

Once DDA receives approval, we will mill or print the final denture.

**Note: With these digital solutions, the try-in is optional, which eliminates the 2nd appointment.*
